

New Seedcare solution for the industrial seed treatment market

EPIVIO™ C brings innovation to the growing stress management and crop enhancement category

1. Enables stronger plant growth
2. Works in harmony with other Seedcare products
3. Acts as meant to: stable and safe

1.

Enables stronger plant growth

Tested on local varieties, with their specific soil and climate conditions, EPIVIO™ C enables **seedling stress recovery from phytotoxicity and improves plant growth and establishment**

Field recovery after Nicosulfuron application

Standard treatment

Syngenta EPIVIO™ C solution

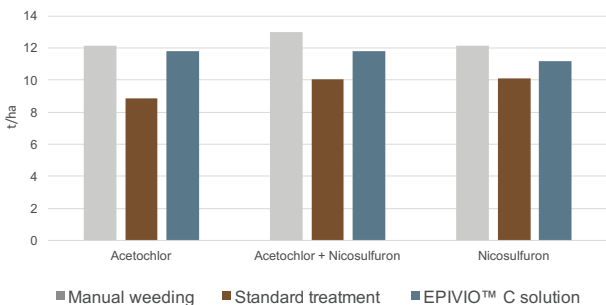

syngenta.

2.

Works in harmony with other Seedcare products

Applied as a seed treatment together with other Syngenta Seedcare products, **EPIVIO™ C** enhances crop herbicide tolerance and demonstrates benefits to yield

Yield increases by EPIVIO™ C solution
Corn trials in Heilongjiang, China, 2015

3.

Acts as meant to: stable and safe

Supported by Syngenta research, the easy to apply, industrial formulations are stable on the seed and activate when planted in soil

Upcoming launches

- First launched for corn in China in 2016
- Further crops and geographies to be added
